<sup>1</sup> Categories include data for funds that invest primarily in other funds.<sup>2</sup> Net new cash flow is the dollar value of new sales minus redemptions, combined with net exchanges.<sup>3</sup> New sales are the dollar value of new purchases of mutual fund shares. This does not include shares purchased through reinvestment of dividends in existing accounts.<sup>4</sup> Exchange sales are the dollar value of mutual fund shares switched into funds within the same fund group.<sup>5</sup> Regular redemptions are the dollar value of shareholder liquidation of mutual fund shares.<sup>6</sup> Exchange redemptions are the dollar value of mutual fund shares switched out of funds and into other funds within the same fund group.<sup>7</sup> A target date fund is designed to satisfy investors' investment objectives by a particular target date, which is usually included in the name of the fund. These funds invest in a mix of asset classes and typically rebalance their portfolios to become more conservative and income producing as the fund approaches and passes its target date.<sup>8</sup> A lifestyle fund maintains a predetermined risk level and generally uses words such as "conservative," "moderate," or "aggressive" in its name to indicate its risk level.  
Note: Components may not add to the total because of rounding.
