¹ Inflation-protected funds are funds that invest in inflation-protected or inflation-indexed securities other than TIPS (Treasury inflation-protected securities).

² TIPS funds invest in Treasury inflation-protected securities, which are backed by the US government and provide protection against inflation, as measured by the Consumer Price Index, while the interest rate remains fixed.

³ Net new cash flow is the dollar value of new sales minus redemptions, combined with net exchanges.

Note: Data for funds that invest primarily in other mutual funds were excluded from the series. Components may not add to the total because of rounding.
